Compiled in these pages are a host of Saab Accessory Options, all signed to complement, enhance and extend the attributes of 1992 Saabs, as well as earlier models. The wide range of Saab dealer-installed optional equipment has been conveniently arranged in three major sections, with items logically grouped within each section. For easy reference, there is also a Table of Contents at the beginning and an Index at the end. Should more detailed information be required, your local authorized Saab dealer stands ready to assist you.

GRAPHIC EQUALIZER/SPECTRUM ANALYZER/COMPACT DISC PLAYER

- Fully compatible with both 1992 Saab/Clarion AM/FM stereo/cassette radios
- Seven band controller and 4 user programmable equalizer presets
- EQ/Spectrum analyzer selector switch and analyzer level selector switch
- Accepts 5" and 3" CDs without adapter
- Track up/down
- Fast forward/fast backward
- Random play
- Track scan
- Track number display
- Oil-damped mechanism minimizes road vibration
- 8x oversampling for state-of-the-art fidelity
- "1" bit D/A converters shape the "staircase" digital into its original smooth analog format for a very accurate reproduction of the original sound
- Audio Compressor circuit redistributes exceptionally high and low signals into a reproducible range for a cleaner, more revealing sound
- Automatic Disc Retract protects an ejected 5" disc from accidental scratching and exposure to sunlight by retracting it back into the player
- Direct Connection circuits eliminate the typical automotive routing of CD output through the FM radio. This design ensures that the high and low frequency response of the CD system will not be compromised
- Slide-out chassis for easy removal with the special tool provided to prevent theft
- Changer controls incorporated into the unit enable a simple addition of a trunk-mounted CD changer (02 47 544)
